

To our customers

Dierikon, 23 April 2024

Komax increases its presence in Tunisia.

Dear customers,

Based on the latest market communication by the long-time Komax distributor Reemi, we would like to inform you about the expansion of our market activities in Tunisia:

To ensure the continuous support of our customers in Tunisia, from 1st of May 2024, Tulintech will serve all customers in Tunisia with the entire portfolio of machines, spare & wear parts and services of the Komax Group companies. Komax Testing Tunisia continues to offer sales and service support for the testing and quality solution equipment.

Having our own presence in Tunisia allows us to understand your requirements even better and to support you with machine offerings, spare parts, technical consultations, training sessions and further services for all Komax brands from a single source.

Strengthening of the team in Tunisia

Tulintech has been established in 2008 and gained lots of experience and expertise by representing Schleuniger and other well-known brands in our industry. Since October 2023, as part of the Lintech Group, Tulintech became a 100% company of the Komax Group. To offer the best sales and service support for Komax products in Tunisia, the team has been further strengthened since then and will soon be enlarged with additional experts and specialists. Experts from Komax in Switzerland provide additional support for this process in Tunisia.

With Komax Group's growing local team, we will respond quickly to your needs, ensuring short reaction time and efficient support. Our technicians are well trained and experienced in Komax and Schleuniger solutions and are committed to providing you with best added value out of one hand.

Please be assured that the Tunisian market plays an important role in our global strategy. Its dynamic wire harness industry and growing demand for innovative solutions make it a key market for Komax. Therefore, we are strongly committed to supporting your growth and success today and in the future.

Regardless of the communicated cooperation with our Chinese competition, we would like to thank Reemi, especially under the leadership of the company founder Mr. Moncef Mhadhebi from 1999 to 2023, for its long-standing partnership and commitment.

We look forward to continuing the partnership-based collaboration with our customers in Tunisia through Tulintech, as a company of the Komax Group.

Please do not hesitate to contact us if you have any questions.

Yours sincerely,

Tobias Rölz
